SKILLS

- Languages: Spanish (Native), English (Intermediate)
- Teamwork, creativity, commitment, adaptability to any environment, problem-solving
- Fast learner

COURSES AND CERTIFICATES

- Modern Software Architecture: DDD, Events, Microservices
Udemy (Daniel Blanco)
- Claude Code in Action
Anthropic
- Introduction to Agent Skill
Anthropic
- Introduction to subagents
Anthropic
- Introduction to Model Context Protocol
Anthropic

PROFILE

Computer Engineer focused on software and web application development. Experienced with technologies such as Java, Spring Boot, JavaScript, TypeScript, React, and Node.js, participating in academic projects and interactive systems. Passionate about software engineering, system architecture, and the exploration of artificial intelligence tools and agents for building innovative solutions.

SPECIALIZATION

- Full-Stack Development (Frontend and Backend)
- Modern Frontend Development with TypeScript, React, and TailwindCSS
- Backend Development with Java, Spring Boot, TypeScript, Node.js and Express
- Use of Design Patterns and SOLID Principles
- RESTful Architecture, API Development, and CRUD Operations
- Application of Microservices, Domain-Driven Design (DDD), and Hexagonal Architecture
- Domain Modeling, Software Architecture, and Deployment
- Use of Docker and CI/CD for Deployments
- Use and Development of Artificial Intelligence Agents (Claude Code, OpenCode, GitHub Copilot)

PROGRAMMING

- **Languages:** JavaScript, TypeScript, Java, Python, C, C#
- **Frontend:** React, Astro, Next.js, TailwindCSS
- **Backend:** Spring Boot, Express, Node.js, FastAPI
- **Database:** PostgreSQL, MySQL, Supabase
- **Design:** Photoshop, Figma
- **Tools:** Docker, Git, GitHub
- **AI:** Claude, GPT

STUDIES

Computer Engineering

ESCUELA SUPERIOR
POLITÉCNICA DEL
LITORAL

2021-2026

Bachelor of Science

UNIDAD EDUCATIVA
ACADEMIA NAVAL
ALMIRANTE
ILLINGWORTH

2014-2020

RECOGNITIONS

</> Outstanding student in community service internships – ESPOL [\[view certificate\]](#)

</> **Finalist** – 20th Edition of the 5 Minute Pitch – FIEC ESPOL [\[view certificate\]](#)

WORK EXPERIENCE

</> **Full-Stack Application Developer Intern at PackVip S.A.S.**

September 2025 – January 2026

- Developed a cross-platform desktop application using React and Electron for operational management and report generation, reducing operational costs, optimizing calculation times, and minimizing human error.
- Designed and implemented backend services with Spring Boot using RESTful APIs and WebSockets for real-time communication.
- Implemented JWT authentication using cookies and security mechanisms for inter-process communication.
- Developed microservices for document generation and Odoo integration using Express and FastAPI.
- Dockerized and deployed services using Render and Supabase.

</> **Full-Stack Web Developer Intern at Solinal S.A.**

February 2025 – May 2025

- Developed and implemented new features for the Etiquetas project using React, TailwindCSS, and Node.js.
- Refactored and enhanced frontend components to improve maintainability, code organization, and user experience.
- Optimized application performance and reduced response times across multiple sections of the platform.
- Contributed to the maintenance and continuous evolution of an enterprise web application built on an existing codebase.

</> **Technology Support at Jesús de Nazareth Fe y Alegría School**

June 2024 – August 2024

- Implemented accessibility tools for children with special needs, providing them with new ways to communicate.

</> **Mobile Application Developer as part of the MIDI Espol Project**

May 2024 – July 2024

- Designed a new interactive game level for children using Unity and C#.
- Developed functionality in JavaScript/TypeScript for sending results to the server through a REST API.
- Implemented client-server communication logic.

</> **Intern at RIVIERA S.A.**

February 2019 – April 2019

- Assisted with graphic design and social media management.
- Performed organizational and office administration tasks.
